

I benefit from listening to XM Satellite Radio and its traffic and weather channels. you would have to be really dumb to not understand how satellite radio provides variety and quality that are not available elsewhere. It should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I think qualifies as freedom of speech.
